

**#51969**

**1971 Chevrolet Chevelle Classic tracked and recovered within ½ hour of being reported stolen by LAPD South West Division**

**Vehicle:** 1971 Chevrolet Chevelle Classic  
**Activation:** LAPD S/W Division      **DATE** 4-20-2011      **TIME** 0941 hrs  
**Recovery:** LAPD S/W Division      **DATE** 4-20-2011      **TIME** 1020 hrs  
**Dealership:** Direct LoJack Sales

The owner of this **1971 Chevrolet Chevelle Classic** dropped his car off at a custom repair shop in Los Angeles for repairs. Apparently the body shop left it parked in their lot over night when thieves stole the vehicle. The victim was notified on 4-20-2011 that the car had been stolen and reported it to LAPD South West Division officers. LAPD caused the vehicle to be entered into the stolen vehicle system/NCIC. That action activated the hidden LoJack transponder on the vehicle. **Within 8 minutes of activation**, officers from the LAPD S/W Division began tracking the vehicle and located the vehicle in a short time parked and abandoned on 41<sup>st</sup> Pl and Avalon St, city of Los Angeles, CA. The vehicle was processed and released to the victim/owner in the field with minor damage to the ignition and missing the sound system. The owner indicated that he has invested **\$40,000** into his Classic and was really happy he had purchased LoJack. **"It got my baby back"**.

LoJack system was installed by specially trained LoJack employees on October 27, 2009

\*\*\*\*\*
